RSOFT-CMB DESCRIPTION

RSOFT-CMB runs on the GE RDESKTOP-C and RDESKTOP-CM computers. The software retrieves relay runtime and activity log data from the Lighting Automation Panels and analyzes same to provide:

- Tenant Invoices for excessive usage of loads
- Billing Summary reports itemizing invoices issued
- Activity logs for individual loads

The user creates tenant groups which are assigned a tenant name and billing address, then specifies which loads are to be added to the tenant group. The user specifies the amount of daily allowable runtime for up to 24 different standard schedules. Each load is assigned to one of the 24 schedules. If the usage on a given day exceeds the daily allowable run time, the tenant is billed for the excess usage at the rate per hour specified for the given load.

Activity Log capability allows the user to retrieve information for individual loads showing the date, time, and initiator of all changes of state. This information is then stored on disk for long term reporting capability.

SPECIFICATIONS

Description	Multiple Site Tenant Billing Software
Catalog #	RSOFT-CMB
Disk Format	3.5" 1.4 MB Floppy and CD ROM
Computer Requirements	Pentium P150 (min.), 32 MB RAM 3.5" 1.4 MB Floppy, CD ROM, and Hard Disk (100 MB min. available) MS Windows 95, 98 or NT 4.0, 1 Serial Port (COM1 or COM2) Requires RSOFT-CM1
Storage Environment	10-50 Degrees C (50-122F) 20-80% RH, Non Condensing Non Corrosive Atmosphere
